

Project Title: Perceived Well-being Experiences of Global South Athletes in Global North Sports Systems: The Case of Canada

Subject Line: Invitation to participate in research

Hello,

We are recruiting participants to participate in a study that we, Dr. Laura Misener and Hamid Mustafa, are conducting on rights and wellbeing of athletes who migrate to Canada from the Global South. Please forward this email on our behalf to potential athletes in your network who meet the inclusion criteria to take part in our study. We aim to explore the concept of well-being and how it transcends physiological, psychological and emotional well-being and can be subjectively measured.

To be eligible to participate, you must meet the following criteria:

1. Be a newcomer immigrant athlete above the age of 18 years
2. Played organised sport prior to arrival in Canada
3. Capacity for conversational English and reliable access to online platforms to conduct interviews

What the study entails: If you agree to participate, you will be asked to conduct a virtual interview. The total time of your participation in the interview will range from approximately 45 to 60 minutes. You will be asked a series of questions about your experiences migrating from the Global South and the impact on your overall wellbeing in addition to exploring how your cultural experiences hinder or promote your wellbeing through the settlement process.

You can withdraw from the survey or interview, at any time, by simply exiting your browser window or informing the interviewer. If you withdraw from the interview, you can manually withdraw by informing the Co-investigator Hamid Mustafa (hmusta3@uwo.ca).

If you are interested in participating or would like additional information about the study, please reach out to the Co-investigator: hmusta3@uwo.ca.

We look forward to hearing from you!

Principal Investigator:

Dr. Laura Misener lmisene@uwo.ca and

Co-investigator: Hamid A. Mustafa

Email: hmusta3@uwo.ca

Best Regards,

Hamid A. Mustafa
